

REQUIRED SAFETY EQUIPMENT

SAFETY FIRST

If you are collecting the equipment for someone else please make sure this sheet is given to the equipment user to read. This sheet should be given to the site supervisor if the equipment is being hired for commercial use so that the information is available to all users.

Before starting any job, be sure to spend a few minutes planning and understanding the hazards and risks of the job. Do this by:

- Thinking about and observing your surroundings
- Running through the steps of the job in your mind
- Identifying the hazards, how you can get hurt and how you'll prevent it
- Knowing what plant and equipment you need
- Only starting when you can do the job safely
- Ensuring you are trained or experienced for the task
- Communicating with everyone involved

Points to consider when planning a task. Can you:

- Come into contact with an energy source (e.g. heat, electricity, substance under pressure) or hazardous materials
- Be struck-by or against anything?
- Be caught-in, on or between anything?
- Slip, trip or fall on the same or too a lower level
- Strain or sprain a muscle?
- Cause damage to plant equipment or property?
- Spill or pollute something?

Lighting Tower – Battery

Pre-Start Checks and Safety

- Keep people away from work area
- Beware of electric cables, gas lines, water pipes etc
- Always beware of falling objects due to vibration
- Children must be kept well clear of work site at all times

Starting Procedure

- Insert fully charged batteries - ensure they lock into place
- Deploy stabilizer legs
- Adjust lights to desired angle
- Raise mast to desired height

When Operating

- Switch lights on
- Adjust light settings to by cycling through modes
- Do not look directly at lamps

Stopping and After Use

- Turn the lights off by the main switch
- Lower mast
- Allow unit to cool before packing away
- Fold in lights and retract stabilizer legs for transportation
- Remove Batteries to fully recharge
